

# 18 TONNE

Designed to take up to 10 tonne payloads, the 18T is ideal for inner city driving and delivering to sites with limited access due to its smaller dimensions and greatly increased manoeuvrability. Versatility and adaptability is key with this model, meaning your load can be moved quickly and efficiently on a compact vehicle.

The Higher Standard.

#### LED STRIP DECK LIGHTS

#### LED WORKLIGHT

## OVERVIEW

Designed to achieve payloads of up to 10 tonne, the 18T is ideal for inner city driving and delivering to sites with limited access due to its smaller dimensions and greatly increased manoeuvrability. It's also more cost effective for single machine or short distance deliveries.

This truck and body combination gives an efficient low deck height and very low loading angles, which is ideal for small plant and access as well as more specialist machines such as spider lifts, mini cranes and agricultural machinery.

Many firms would specify 18T plant vehicle with shorter body lengths to reduce the turning circle and rear overhang which increases manoeuvrability, but any lengths from 6M up to 9M is achievable, when specified with suitable chassis wheelbase.

If you're looking for a plant body that gives maximum flexibility for varied loads, then this remarkable product is perfect for you and your fleet, no matter what the specification.

## WHY CHOOSE STERLING?

### 1 THE HIGHER STANDARD

Our stringent Quality Assurance processes, combined with high quality materials and CE marked components, guarantee the reliability of the product and minimise down-time. Those exacting standards extend to our customer service too, the Sterling culture of integrity means responding quickly and keeping you informed at every stage of the process.

### 2 BUILT TO LAST

Our products are built using only the finest and strongest materials, finished off with a galvanising process that ensures they stand the test of time. This eliminates the need for costly maintenance, making the cost of ownership lower. It also means that many truck manufacturers value a truck fitted with a Sterling body with up to 10% higher residual value.

### 3 INSIGHTFUL INNOVATIONS

Intelligent additions, like our electro-hydraulically operated ramps, not only save effort, they save fuel too. That means lower operating costs overall. Or how about something you can't put a price on? The unique shallow loading angle of our cheesewedge ramp dramatically improves loading safety, giving you peace of mind.

### 4 SMART DESIGN

Intelligent innovations are made all the better when they are easy on the eye. Our clean aesthetics give a visual boost to your brand image, hiding rams on our cheesewedge design and keeping overall clutter to a minimum.
